**Errata – IAPMO UES Evaluation Reports**

Please note the following editorial corrections:

<b>Verco Deck:</b>	IAPMO ER-2018	Page 13 of 54	Revised 08/02/2021
<b>Dovetail Deck:</b>	IAPMO ER-0423	Page 10 of 24	Revised 08/02/2021
<b>Vulcraft Deck:</b>	IAPMO ER-0652	Page 11 of 50	Revised 08/02/2021

Under section titled:

**“DIAPHRAGM SHEAR STRENGTH AND STIFFNESS OF STRUCTURAL CONCRETE FILLED STEEL DECK SLABS”**

The defined dosage range, D for Bekaert Dramix® 4D 65/60 BG steel fibers should be corrected to the following:

For normal weight concrete,  $15 \text{ pcy} \leq D \leq 66 \text{ pcy}$

For light weight concrete,  $20 \text{ pcy} \leq D \leq 66 \text{ pcy}$

This correction occurs in two places just above and just below Eq. BD-1. This correction will be included in the next revised version of ER-2018, ER-0423 and ER-0652.
